

BEFORE STARTING

- Remove the insulation tape at the back of calculator. (Figure a)
- Remove the tape on the ink ribbon of calculator. (Figure b, c)
- Plug in AC power cord. (Figure d)
- Turn the power switch on. (Figure e)
- Press [RESET] key before use. (Figure f)

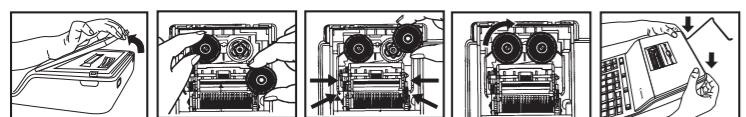

INSTALLING PRINTING PAPER

- Note:** Turn the power off.
- Remove the printer cover (Figure 1) and lift up the paper arm (Figure 2).
 - Replace the printer cover (Figure 3).
 - When inserting the paper, cut the edge of the paper as shown (Figure 4).
 - Place the new paper roll on the arm. The edge of the paper should be positioned as shown (Figure 5).
 - Suitable paper roll -- Width : 57mm (2-1/4") / Diameter: 86mm (3-3/8")
 - Insert the paper into the slit located of the machine as indicated (Figure 6).
 - Turn the power switch on (Figure 7). Press the paper feed key to advance the paper (Figure 8).

REPLACING THE INK RIBBON

- Note:** Turn the power off.
- Remove the cover and lift up the paper arm.
 - Lift ribbon spools off the shafts. Discard the old ribbon and spools.
 - Place the ribbon spool on the left spool pin and push it down until it clicks.
 - Thread the ribbon along the outer edge of the side guide, making sure that the black half of the ribbon is still on the top.
 - Place the ribbon between the printing ring and printing roller. Thread the ribbon along the outer edge of the left side guide.
 - Place the other ribbon spool on another spool pin.
 - Push the spool down until it clicks.
 - Take up any ribbon slack by rotating the left spool counterclockwise.
 - Replace the printer cover.

IMPORTANT: Use only the same type of ribbon spools.

REPLACING BACKUP BATTERY

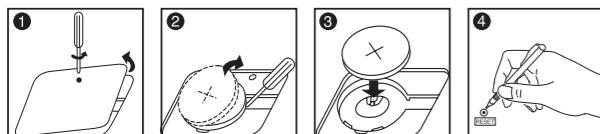

Memory backup battery retains the tax rate, calendar and clock setting, when the power is off or even when the AC cord is disconnected.

Battery : 1 Lithium battery (Type : CR2032)

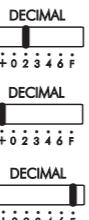

Battery life : Backup time 2000 hours

Replace back-up battery

CAUTION: Risk of explosion if battery is replaced by an incorrect type. Dispose of used batteries according to the instruction.

DECIMAL POINT SELECTOR SWITCH

- Used for designating the decimal point position (+ 0 2 3 4 6 F) for calculated results.
- + (Add-Mode)** – Addition and subtraction functions are performed with an automatic 2-digit decimal. It is convenient for currency calculations.
- F (Floating Decimal Point)** – All effective numbers up to 12 digits are printed or displayed.

ROUNDING SWITCH

- Used for round-up [\uparrow], round-off [5/4], or round-down [\downarrow] to the pre-selected decimal digits in the result.

GRAND TOTAL / RATE SET SWITCH

GRAND TOTAL

- When the calculations are performed with the GT switch set to "ON", the total(s) are accumulated in the grand total memory. Each time \times is pressed, the subtotal number is printed with the symbols G+. When GT is pressed, the intermediate grand total is printed with the symbols G◊. Press GT successively to get the grand total followed by the symbols G*

TAX RATE SET

- Set switch to "TAX RATE SET" for setting or recalling the TAX rate.

PRINT / ITEM COUNT SWITCH

- Print Off** – Entries and results will appear on the display, but will not be printed out.

- Print On** – Entries and results will appear on the display and will be printed out.

- Item** – Set switch to "ITEM" to count the number of times the $+$, $-$, \times and \div keys have been pressed. The item count will be printed on the left hand side of the paper roll (up to 999 times) when the \diamond , \times , \square or \div keys are pressed.

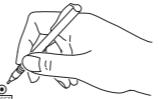

OVERFLOW

In the following cases, when "E" is displayed, "ERR" is printed, the keyboard is electronically locked, and further operation is impossible.

Press to clear the overflow. The overflow occurs when:

- The result or the memory content exceeds 12 digits to the left of the decimal point.
- Dividing by "0".
- The sequential operation speed is faster than the calculation processing speed. (Buffer Register Overflow)

■ Electromagnetic interference or electrostatic discharge may cause the display to malfunction or the memory, currency rate and tax rate to be lost or altered. Should this occur, use the tip of a ballpoint pen (or similar sharp object) to press the [RESET] button on the back of the calculator. After resetting be sure to set the calendar, clock and tax rate again.

SPECIFICATION

Power Source: AC120V, 60Hz

Operation Temperature: 0°C to 40°C (32°F to 104°F)

Calculating Capacity: 12 digits maximum

Dimension: 320mm (L) x 193 mm (W) x 71mm (H) /

12-39/64" (L) x 7-39/64" (W) x 2-51/64" (H)

Weight: 1,532 g (3.37 lbs)

(Subject to change without notice)

- The socket-outlet shall be installed near the equipment and shall be easily accessible.

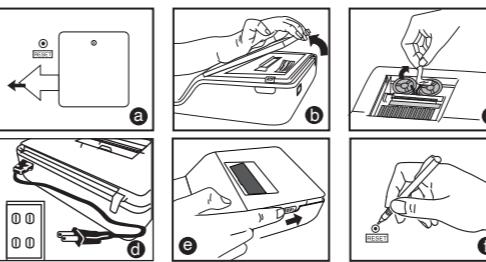

For CA, USA Only

Included battery contains perchlorate material - special handling may apply. See <http://www.dtsc.ca.gov/hazardouswaste/perchlorate/> for detail.

⚠ The top case, bottom case, printer cover and battery cover in this product are made from recycled Canon copier plastic.

ANTES DE EMPEZAR

- Retire la cinta aislante de la parte trasera de la calculadora. (Figura a)
- Retire la cinta en la cinta de tinta de la calculadora. (Figura b, c)
- Conecte el cable de alimentación de CA. (Figura d)
- Encienda la impresora. (Figura e)
- Pulse la tecla [RESET] antes de utilizarla. (Figura f)

ESPAÑOLA

DECIMAL

– Se utiliza para marcar la posición de la coma decimal (+ 0 2 3 4 6 F) de los resultados calculados.

+ (modo suma) – las funciones de suma y resta se llevan a cabo con dos decimales automáticamente. Es un modo muy práctico para los cálculos monetarios.

F (coma decimal flotante) – se muestran o imprimen todos los números efectivos de hasta 12 dígitos.

CONMUTADOR DE REDONDEO

– Se utiliza para redondear por exceso [\uparrow], redondear [5/4] o redondear por defecto [\downarrow] los decimales que se hayan seleccionado previamente del resultado.

TECLA DE GRAN TOTAL / RATE SET

GRAND TOTAL

– Cuando los cálculos se realizan con el conmutador GT (total global) en "ON", los totales parciales se acumulan en la memoria del total global. Cada vez que se pulsa \times , el subtotal resultante se imprime con los símbolos GT. Cuando se pulsa GT, el total global intermedio se imprime con los símbolos G◊. Pulse GT sucesivamente para obtener el total global seguido del símbolo G*.

AJUSTE DEL TIPO IMPOSITIVO

– Coloque el conmutador en "TAX RATE SET" para definir o recordar el tipo impositivo.

IMPRESIÓN / RECUENTO ITEM

Sin impresión – las entradas y resultados aparecerán en la pantalla pero no se imprimirán.

Con impresión – las entradas y resultados aparecerán en la pantalla y también se imprimirán.

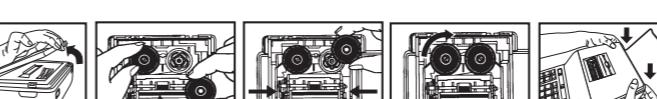

Elemento – sitúe el conmutador en "ITEM" para contar el número de veces que se pulsa las teclas +, -, \times , \div y \diamond . El contador de elementos se imprimirá a la izquierda del rollo de papel (hasta 999 veces) cuando se pulsen las teclas \diamond , \times , \square o \div .

COMO CAMBIAR LA CINTA

Nota: Apague el interruptor de alimentación.

- Retire la tapa de la impresora y levante el brazo de papel. (Figura 1, 2)
- Vuelva a colocar la tapa de la impresora. (Figura 3)
- Para introducir el papel, corte el borde tal como se muestra. (Figura 4)
- Coloque el nuevo rollo de papel en el eje. El borde del papel debe estar colocado tal como se muestra (Figura 5).
- Rollo de papel compatible – Anchura: 57 mm (2-1/4") / Diámetro: 86 mm (3-3/8") máx.
- Introduzca el papel en la ranura situada en la parte trasera de la calculadora como se indica (Figura 6).
- Encienda la impresora. (Figura 7) Pulse la tecla de alimentación de papel FEED para hacerlo avanzar, según se muestra en la figura. (Figura 8)

IMPORTANTE: Utilice siempre el mismo tipo de carrete de cinta.

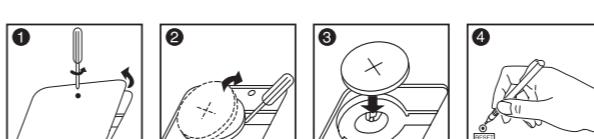

REEMPLAZO DE LA BATERÍA DE RESPALDO

La batería de seguridad de la memoria conserva el ajuste en uso del tipo impositivo, del calendario y del reloj aunque se apague la calculadora y se desconecte el cable de CA.

Batería: 1 batería de litio (tipo: CR2032)

Duración de la batería: 2000 horas de soporte de seguridad

PRECAUCIÓN: si se sustituye la batería por una de tipo incorrecto, existe riesgo de explosión. Deseche las baterías usadas siguiendo las instrucciones.

ESPECIFICACIONES

Fuente de alimentación: AC120V, 60Hz

Temperatura de funcionamiento: 0 °C a 40 °C (32 °F a 104 °F)

Capacidad de cálculo: 12 dígitos como máximo

Dimensiones: 320mm (An) x 193 mm (Pr) x 71mm (Al) /

12-39/64" (An) x 7-39/64" (Pr) x 2-51/64" (Al)

Peso: 1,532 g (3.37 lbs)

(sujeto a cambios sin previo aviso)

- La toma de corriente debe instalarse cerca del equipo y debe ser fácilmente accesible.**

Para el Ca, los E.E.U.U. Solamente

La batería incluida contiene el material del perclorato - El manejo especial debe ser aplicado. Para el detalle, por favor ver <http://www.dtsc.ca.gov/hazardouswaste/perchlorate/>

⚠ El caso de la parte superior, tapa inferior, tapa de la impresora y la cubierta de la batería en este producto están hechos de plástico reciclado copiadora Canon.

CLOCK & CALENDAR FUNCTION / FUNCIÓN DEL RELOJ Y DEL CALENDARIO

- Used to switch between clock or calendar mode.
- Sirve para cambiar entre los modos de reloj y calendario.
- Used to switch between 12 or 24 hour at clock mode time setting.
- Sirve para cambiar entre 12 o 24 horas en el ajuste horario del modo de reloj.
- Used to set the date and time in calendar & clock mode.
- Sirve para fijar la fecha y la hora en los modos de calendario y reloj.
- Used to switch between AM or PM at clock mode time setting.
- Sirve para cambiar entre AM o PM en el ajuste horario del modo de reloj.
- Used to select date format between "YYYY/MM/DD", "DD/MM/YYYY" or "MM/DD/YYYY" at calendar mode.
- Sirve para seleccionar el formato de fecha entre "AAAA/MM/DD", "DD/MM/AAAA" o "MM/DD/AAAA" en el modo de calendario.

Date setting / Ajuste de la fecha

Example / Ejemplo : November 17 2010

Operation / Operación	Display / Exponer	Print Out / Imprimir
1)	01-01-2002	01-01-2002
2) (Hold 3 seconds)	01-01-2002	11-17-2010
3) 1 1 1 7 2 0 1 0 =	11-17-2010	
4) (Return to calculation mode)	0.	0.C

Time setting / Ajuste de hora

Example / Ejemplo : 3 : 18 pm

Operation / Operación	Display / Exponer	Print Out / Imprimir
1) (On Calculation mode)	12-00-18 A	12-09
2) (Hold 3 seconds)	12-01 A	03-18
3) 0 3 1 8 =	03-18-00 P	
4) (Return to calculation mode)	0.	0.C

FCC REGULATIONS
This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:
1) this device may not cause harmful interference, and
2) this device must accept any interference received, including interference that may cause undesired operation.
NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
• Reorient or relocate the receiving antenna.
• Increase the separation between the equipment and receiver.
• Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
• Consult the dealer or an experienced radio/TV technician for help.
Do not make any changes or modifications to the equipment unless otherwise specified in the manual. If such changes or modifications should be made, you could be required to stop operation of the equipment.
